

PROPOSAL FOR

Infinity Clinic

Clinic Management System

Patient Website + Receptionist / Doctor / Admin Portals

Quote No.: **AR-2026-0089**

Date: **07 August 2026**

Valid Until: **06 September 2026**

Prepared by: **Arimini**

Why This Pays For Itself

Missed or no-show appointments from phone-call scheduling and manual diary management add up to real lost consultation revenue every month, online booking with confirmation cuts this significantly.

Front-desk overload: a receptionist juggling phone calls, walk-ins, and a paper register loses time per patient that a digital queue recovers instantly, meaning more patients seen per day without adding staff.

Patient experience: patients today expect to book online and see wait status, the way they do with every other service, clinics without this lose patients to competitors who have it.

One-time cost vs. ongoing leakage: Option B costs less per month than a single missed high-value consultation slot.

Service Packages

Two ways to get the same system live in 18–23 working days.

Option A — Total Handover

One-time buyout. Client owns everything outright — full source code, database, deployment credentials.

₹59,000

ONE-TIME · 18–23 DAYS

- ✓ Full source code + IP transfer
- ✓ Deployment docs & credential handover
- ✓ No dependency on Arimini afterward
- ✓ 30-day post-launch bug-fix warranty
- ✓ AMC optional & quoted separately (₹9,000–10,000/yr)

Option B — Monthly Subscription

Fully managed, SaaS-style. Arimini hosts and maintains the system on a dedicated VPS for this clinic.

₹6,500 + ₹2,000/mo

ONBOARDING + MONTHLY · 18–23 DAYS

- ✓ Lowest upfront commitment & will be live in the same 18–23 days
- ✓ Hosting, maintenance, support & updates included
- ✓ 12-month minimum recommended; cancel anytime after with data export
- ✓ Upgradeable to Option A anytime — up to ₹12,000 credited toward handover

Scope Covered in This Quote

- ✓ Public patient website (home, about, doctors, services, testimonials, contact , all admin-editable)
- ✓ Online appointment booking with optional Razorpay payment (pay online or at clinic)
- ✓ Real-time OPD queue & token system (receptionist + doctor live dashboards)
- ✓ Receptionist panel (registration, search, appointments, walk-ins, queue, offline payment/receipts)
- ✓ Doctor panel (consultations, diagnosis, prescriptions, patient history)
- ✓ Admin panel (doctor/receptionist management, appointment oversight, full website CMS, clinic settings)
- ✓ Deployment on a single VPS with backups and SSL

Excluded from both models: WhatsApp Business API integration (requires separate Meta verification and a paid BSP subscription , can be added later without rework, since the system is built with a notification-channel extension point).

Technical Overview

- ✓ Modern, industry-standard stack: React (frontend), Node.js/Express (backend), PostgreSQL (database).
- ✓ Real-time OPD queue: token/queue updates push instantly to receptionist and doctor screens via WebSockets.
- ✓ Secure login system: role-based access control with encrypted passwords and token-based authentication — no shared logins.
- ✓ Payment security: Razorpay's secure checkout handles all card/UPI details , this system never touches raw card data.
- ✓ HTTPS/SSL encryption on the entire site by default.
- ✓ Daily automated backups of the database.
- ✓ Built to scale to more doctors, more receptionists, or a second clinic branch without a redesign.

Recurring Costs (Annual)

Applies to Option A, where the client holds and pays these accounts directly. Under Option B, hosting is bundled into the monthly fee.

Item	Who Pays	Cost	Notes
VPS hosting (client's choice) under Option A	Client	₹700–1,299/mo (~₹13,000–24,000/yr), Hostinger KVM2 as reference	Client selects and owns the VPS/provider; cost varies with the plan chosen
Domain name (.com/.in)	Client	₹700–1,200/yr	Renews annually
SSL Certificate	—	Free	Let's Encrypt, auto-renewed
Razorpay transaction fee	Client	Based on Razorpay charges	Charged by Razorpay, not Arimini
WhatsApp API (optional)	Client	₹4,999 one-time + Meta fees (client)	Meta verification & messages billed directly by Meta to Client

Project Terms

Term	Detail
Timeline	18–23 working days from kickoff and receipt of advance/onboarding payment, subject to timely client feedback.
Payment terms (Option A)	30% advance / 40% mid-development / 30% on final handover.
Payment terms (Option B)	₹6,500 onboarding upfront, then ₹2,000/month; 12-month minimum recommended.
Demo before final payment	A working demo/preview of the patient booking flow is shown before the final milestone payment is due.
Revision window	15-day free minor-revision window after go-live (content/branding tweaks, not new features), both options.
Warranty (Option A)	30-day post-launch bug-fix warranty. AMC optional, quoted separately.
Ownership (Option B)	No source code ownership; access ends if subscription lapses, same as any SaaS product. Upgradeable to Option A anytime.
Taxes	All prices are exclusive of GST unless stated otherwise; GST added as applicable at billing.

Why Arimini

Modern, Scalable Stack React, Node.js/Express and PostgreSQL, the same class of stack used by large-scale healthcare and fintech products, not a page-builder or template system.	Real-Time OPD Queue Token and queue updates push instantly to receptionist and doctor screens via WebSockets, so both sides always see the current queue live.
Full Data Ownership, If You Want It Start on the low-commitment monthly plan and upgrade to full source-code ownership at any time, no work is wasted in that path.	Security By Default Role-based access control, encrypted passwords, token-based authentication, HTTPS/SSL everywhere, and daily automated backups.

Technology Stack

Built on React (frontend), Node.js/Express (backend) and PostgreSQL (database) — the same class of stack used by large-scale healthcare and fintech products, not a page-builder or template system. The OPD queue updates in real time via WebSockets, access is protected by role-based, token-authenticated logins with encrypted passwords, and the architecture is built to scale to more doctors, staff, or a second clinic branch without a redesign.

Thank you for the opportunity to build this for you.
